Knowledge Technology People

Enerpro Systems Corp.

Enerpro is North America's only provider of full-service, intelligent, energy management programs for new construction and infrastructure upgrades in retrofitted buildings, since 1996.

Enerpro leads the market with a unique, integrated approach. We recognize technology is a tool, enabled by knowledge, and engaged by people. These three essential elements underpin our customized programs.

Our comprehensive suite of services and technologies support the on-demand characteristics and complexities of the continuous cycle of energy and water management.

The results are measureable, economic, environmental and sustainable.

Why Manage Energy?

For the planet and for your bottom line.

Enerpro's programs make buildings run better. Enerpro aligns knowledge, technology and people -- bridging gaps in the complex and fragmented process of multiple energy and water uses in a building.

Full-service energy management programs from Enerpro bring consistent, positive economic results and benefits to the environment.

Applications

For new construction and for retrofitted existing buildings.

- Multi-Family Residential
- Big Box Retail
- Shopping Centers
- Warehouses
- Institutional Properties
- Commercial Buildings

Pay Yourself

Innovative finance models can mean no capital outlays, and a structured revenue model that pays you in savings.

Recover administration costs by enhancing property management effectiveness.

That's not just good, it's great for your bottom line and the environment too.

Energy Management Systems

An energy management plan is more than recommendation. It's a full-service program that aligns technology, knowledge and people -- bridging gaps in the complex process of multiple energy and water uses in a building.

Enerpro manages all traditional energy systems as well as leading edge technologies such as geothermal, solar, wind and fuel cell.

Analysis Services:

- Forecast potential savings
- Consumption data
- Performance benchmarking
- Historical data comparison
- Consumption optimization
- Government program funding consultation
- Lifecycle costing and cost benefit analysis
- Design consultation and coordination
- Financing models showing ROI

Technical Services:

- Rate analysis
- Fuel switching
- Voltage regulation
- Mechanical analysis
- Lighting controls
- Innovative design
- CO₂ sensing & monitoring
- Data storage
- Mechanical sizing
- Integrated power line communication
- Technical research and development
- Equipment performance optimization

Program Services

- Full service integrated programs, with real time monitoring
- Post retrofit continued administration
- Event reporting
- Off site meter reading
- Reports of measured results
- Managed Accounts Receivable System MA RS
- Dispute resolution
- Capital financing
